March 19-20, 2009, Emory Conference Center Hotel, Atlanta, GA

All patients are vulnerable to some degree by virtue of their illness or injury, and their interactions with or dependence on the health care system. Certain patient groups experience an increased level of vulnerability by virtue of the nature of their illness, characteristics of the health care system, and social justice concerns. "Wicked" problems are those that are complex, extremely difficult to address, require the involvement of multiple disciplines and perspectives, and are likely to recur. During this year's conference we will explore the nature of vulnerability and wicked problems through patient narratives, with particular attention to ethical issues in: neurological disability, access to care and mental illness.
